Am I Covered for IMBRUVICA® (ibrutinib)?

Insurance Coverage Basics

Most people have healthcare and prescription drug insurance through a private company or through a government program.

Commercial (or private) insurance is coverage you have through your employer or that you have purchased directly from an insurance company or the health insurance marketplace.

Government insurance is coverage you get from the federal government or from the state where you live. Common plans include Medicare, Medicare Part D, Medicaid, TRICARE, VA, and DoD.

If your insurance coverage changes, for example, if you get a new job, retire, or sign up for a new plan, Access Specialists are available to help with a new benefits investigation for IMBRUVICA®.

Monday-Friday, 8:00 AM-8:00 PM, Saturday 8:00 AM-5:00 PM ET

Please review the Important Side Effect Information on pages 11-13.
Your out-of-pocket costs depend on your type of insurance coverage and the details of your plan. An Access Specialist may be able to help you estimate your out-of-pocket costs for IMBRUVICA® (ibrutinib).

There may be financial support options available for your insurance type.

**Commercial Insurance**

Eligible patients with commercial insurance may pay as little as $10 per monthly prescription of IMBRUVICA® through the IMBRUVICA® Copay Program*.

To sign up, visit [www.imbruvica.com](http://www.imbruvica.com) or call an Access Specialist.

**1-877-877-3536**

Monday–Friday, 8:00 AM–8:00 PM and Saturday, 8:00 AM–5:00 PM ET

---

* Eligible patients may qualify to pay as little as $10 per prescription of IMBRUVICA® until the maximum limit of $24,600 per calendar year is reached. The IMBRUVICA® Copay Program cannot be used with any other federally-funded prescription insurance plan. Federally-funded plans include Medicare Part D, Medicare Advantage Plan, Medicaid, TRICARE, or any other federal or state healthcare plan, including pharmaceutical assistance programs.

* Please review the Important Side Effect Information on pages 11-13.
How Can I Learn More About Out-of-Pocket Costs?

Your out-of-pocket costs depend on your type of insurance coverage and the details of your plan.

There may be financial support options available for your insurance type.

**Government Insurance**

If you have Medicare or Medicare Part D, your cost may vary month to month depending on your coverage phase.

Access Specialists may help you confirm your out-of-pocket costs for IMBRUVICA® (ibrutinib).

Learn more about what IMBRUVICA® costs at www.imbruvica.com.

Please review the Important Side Effect Information on pages 11-13.
The specialty pharmacy calls you to confirm any out-of-pocket costs and your preferred delivery address for IMBRUVICA®.

The specialty pharmacy works with your doctor and your insurance company to find out if you are covered for IMBRUVICA®.

If more information is needed, your doctor may send additional paperwork to the specialty pharmacy or your insurance company.

Your first shipment of IMBRUVICA® arrives, and you can begin taking it right away as your doctor prescribed.

This is one way your prescription may be filled and delivered to you. The process may look different in your doctor’s office.

To find out what you can expect, you can ask your healthcare team.

IMPORTANT SIDE EFFECT INFORMATION

Before taking IMBRUVICA®, tell your healthcare provider about all of your medical conditions, including if you:

• have had recent surgery or plan to have surgery. Your healthcare provider may stop IMBRUVICA® for any planned medical, surgical, or dental procedure.
• have bleeding problems.
• have or had heart rhythm problems, smoke, or have a medical condition that increases your risk of heart disease, such as high blood pressure, high cholesterol, or diabetes.
• have an infection.
• have liver problems.
• are pregnant or plan to become pregnant. IMBRUVICA® can harm your unborn baby. If you are able to become pregnant, your healthcare provider will do a pregnancy test before starting treatment with IMBRUVICA®. Tell your healthcare provider if you are pregnant or think you may be pregnant during treatment with IMBRUVICA®.
• Females who are able to become pregnant should use effective birth control (contraception) during treatment with IMBRUVICA® and for 1 month after the last dose.
• Males with female partners who are able to become pregnant should use effective birth control, such as condoms, during treatment with IMBRUVICA® and for 1 month after the last dose.
• are breastfeeding or plan to breastfeed. Do not breastfeed during treatment with IMBRUVICA® and for 1 week after the last dose.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Taking IMBRUVICA® with certain other medicines may affect how IMBRUVICA® works and can cause side effects.

How should I take IMBRUVICA®?

• Take IMBRUVICA® exactly as your healthcare provider tells you to take it.
• Take IMBRUVICA® 1 time a day.
• Swallow IMBRUVICA® capsules or tablets whole with a glass of water.
• Do not open, break, or chew IMBRUVICA® capsules.
• Do not cut, crush, or chew IMBRUVICA® tablets.
• Take IMBRUVICA® at about the same time each day.
• If you miss a dose of IMBRUVICA® take it as soon as you remember on the same day. Take your next dose of IMBRUVICA® at your regular time on the next day. Do not take extra doses of IMBRUVICA® to make up for a missed dose.
• If you take too much IMBRUVICA® call your healthcare provider or go to the nearest hospital emergency room right away.

What should I avoid while taking IMBRUVICA®?

• You should not drink grapefruit juice, eat grapefruit, or eat Seville oranges (often used in marmalades) during treatment with IMBRUVICA®. These products may increase the amount of IMBRUVICA® in your blood.
What are the possible side effects of IMBRUVICA®?

IMBRUVICA® may cause serious side effects, including:

- **Bleeding problems (hemorrhage)**
  are common during treatment with IMBRUVICA®, and can also be serious and may lead to death. Your risk of bleeding may increase if you are also taking a blood thinner medicine. Tell your healthcare provider if you have any signs of bleeding, including: blood in your stools or black stools (looks like tar), pink or brown urine, unexpected bleeding, or bleeding that is severe or that you cannot control, vomit blood or vomit looks like coffee grounds, cough up blood or blood clots, increased bruising, dizziness, weakness, confusion, change in your speech, or a headache that lasts a long time or severe headache.

- **Infections** can happen during treatment with IMBRUVICA®. These infections can be serious and may lead to death. Tell your healthcare provider right away if you have fever, chills, weakness, confusion, or other signs or symptoms of an infection during treatment with IMBRUVICA®.

- **Decrease in blood cell counts.**
  Decreased blood counts (white blood cells, platelets, and red blood cells) are common with IMBRUVICA®, but can also be severe. Your healthcare provider should do monthly blood tests to check your blood counts.

- **Heart rhythm problems (ventricular arrhythmias, atrial fibrillation and atrial flutter).** Serious heart rhythm problems and death have happened in people treated with IMBRUVICA®, especially in people who have an increased risk for heart disease, have an infection, or who have had heart rhythm problems in the past. Tell your healthcare provider if you get any symptoms of heart rhythm problems, such as feeling as if your heart is beating fast and irregular, lightheadedness, dizziness, shortness of breath, chest discomfort, or you faint. If you develop any of these symptoms, your healthcare provider may do a test to check your heart (ECG) and may change your IMBRUVICA® dose.

- **High blood pressure (hypertension).**
  New or worsening high blood pressure has happened in people treated with IMBRUVICA®. Your healthcare provider may start you on blood pressure medicine or change current medicines to treat your blood pressure.

- **Second primary cancers.** New cancers have happened during treatment with IMBRUVICA®, including cancers of the skin or other organs.

- **Tumor lysis syndrome (TLS).** TLS is caused by the fast breakdown of cancer cells. TLS can cause kidney failure and the need for dialysis treatment, abnormal heart rhythm, seizure, and sometimes death. Your healthcare provider may do blood tests to check you for TLS.

The most common side effects of IMBRUVICA® in adults with B-cell malignancies (MCL, CLL/SLL, WM and MZL) include:

- diarrhea
- tiredness
- muscle and bone pain
- rash
- bruising
IMPORTANT SIDE EFFECT INFORMATION (cont’d)

The most common side effects of IMBRUVICA® in adults with cGVHD include:

• tiredness
• bruising
• diarrhea
• mouth sores (stomatitis)
• muscle spasms
• nausea
• pneumonia

Diarrhea is a common side effect in people who take IMBRUVICA®. Drink plenty of fluids during treatment with IMBRUVICA® to help reduce your risk of losing too much fluid (dehydration) due to diarrhea. Tell your healthcare provider if you have diarrhea that does not go away.

These are not all the possible side effects of IMBRUVICA®. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

General information about the safe and effective use of IMBRUVICA®

Medicines are sometimes prescribed for purposes other than those listed in a Patient Information leaflet. Do not use IMBRUVICA® for a condition for which it was not prescribed. Do not give IMBRUVICA® to other people, even if they have the same symptoms that you have. It may harm them. You can ask your pharmacist or healthcare provider for information about IMBRUVICA® that is written for health professionals.
